

MKTL432

Adjustable Accurate Reference Source

DEVICE DESCRIPTION:

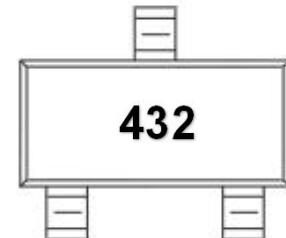

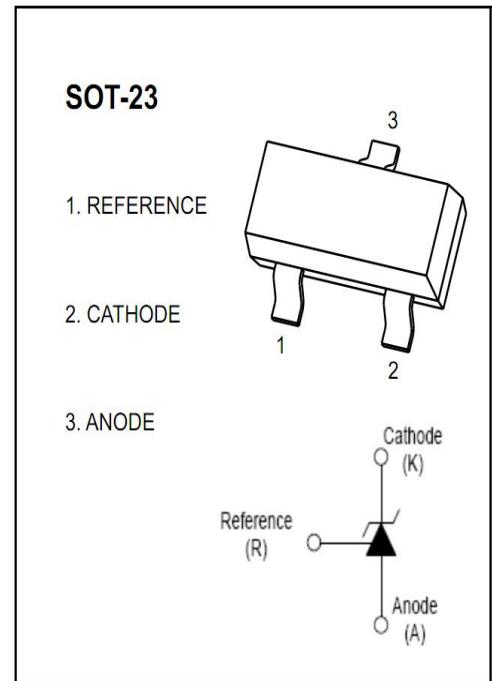

The MK TL432 is a three-terminal adjustable shunt regulator highly accurate 1.24V band gap reference with 0.5%, 1% tolerance. The device offers thermal stability, wide operating current (50mA) and an extended temperature range of 0 \diamond to 85 \diamond C for operation in power supply applications. The MK TL432 offers a wide operating voltage range of up to 12V and is an excellent choice for voltage reference requirements in an isolated feedback circuit for 3.0V ~ 3.3V switching mode power supplies. The tight tolerance guarantees a lower design cost for the power supply manufacturer by virtually eliminating the need for an extra power supply manufacturing process of the power supply

FEATURES:

- #. Low dynamic output impedance
- #. The effective temperature compensation in the working range of full temperature
- #. Low output noise voltage
- #. Fast on -state response
- #. Sink current capability of 0.1mA to100mA

APPLICATION:

- Shunt Regulator
- High-Current Shunt Regulator
- Precision Current Limiter
